

The Hepatitis C Team at Street Health Centre

A comprehensive, multidisciplinary HCV team, a holistic community based approach to provide care and support for those infected by or at risk of acquiring HCV

The hepatitis C team is made up of a multi-disciplinary group of registered nurses, physicians, outreach workers and counselors.

Main goal of the program: Improve access to Hepatitis C care, support and treatment services to ultimately reduce the spread of Hepatitis C Virus.

Objectives

- Increase testing numbers;
- Improve treatment outcomes;
- Improve coordination of support services;
- Increase engagement with hard-to-reach, high-risk populations;
- Increase availability of psychosocial services;
- Improve knowledge and awareness of Hepatitis C risk factors and transmission for health care practitioners, service providers, clients.

Hepatitis C treatment

The team follows the best practices available for treatment. We understand that it is your right to decide when to initiate treatment and we work with you and support you along the way. Our team puts your health and well-being first.

Individual counseling

We at Street Health Centre know that thinking about treatment can be challenging and disturbing. Different questions arise, the uncertainties and the fear can mount, support from family and friends can be hard to get. We provide a non-judgmental environment, which values your uniqueness and aspirations, supporting you in every step of the process.
